

**HARD HATS
SAVE LIVES.**

HEAD PROTECTION.

*It is our goal to satisfy
your needs through our
expertise and variety
of products.*

Experts you can trust

Protecting your crew from potential hazards, especially head injuries, on the job site are key to any safety program. Employers must ensure head protection is worn if:

- ▶ Objects might fall from above and strike them on the head.
- ▶ They might bump their heads against fixed objects, such as exposed pipes or beams.
- ▶ There is a possibility of accidental head contact with electrical hazards.

Be sure to understand all potential hazards when selecting gear for your crew. **Premier Safety** is your source for top-of-the-line head protection from leading suppliers of Personal Protective Equipment, like MSA.

**From proper care to proper usage, asking
the right questions can help keep workers safe.**

- ▶ How do I select the appropriate head protection?
- ▶ Is our head protection the right fit and comfort?
- ▶ What is the best method of maintenance & storage?
- ▶ Do we inspect head protection equipment routinely?
